

Swivl for Students

Flipped Classroom

Bookmark your video so students know where to focus. Time-stamped commenting provides opportunities for students to interact in a secure and private channel.

Language Acquisition

Track and accelerate language development for ELLs and foreign language learners. Focus on individual needs with multi-video and multi-audio capabilities.

Student Presentations

Students become the teachers when they take the lead. Promote college-readiness by Screen Recording their presentations while they record themselves.

Distance Learning

Students can participate wherever they are with Swivl Live Streaming and Zoom. Bring homebound students back into an authentic classroom environment.

“Swivl provides more opportunities for educators to inform and engage students. And for students, Swivl provides the comfort of face-to-face instruction when they need it and the flexibility of technology when they want it.”

-Joe Childs, Principal, Mitchell High School
